

## ABOUT

Nowadays the Informal Transversal Skills are often the key to access a job and are likely to become essential in today's work environment.

**VALITS 2.0** is a project aimed to help low-skilled persons and disadvantaged groups in having their personal skills recognised and then to either use these to find employment or to learn new skills and improve existing skills.

## INFORMAL TRANSVERSAL SKILLS

Every person has **Informal Transversal Skills**, which are learned in an environment outside the formal learning and are relevant to a broad range of occupations and sectors as they cannot be replaced by computers or robots.

Typical examples are teamworking skills, interpersonal skills, language skills, digital skills, leadership skills, and many more.

## OBJECTIVES

The **VALITS 2.0** project will enhance access to training, qualifications and employment for low-skilled workers by

Assessing their Informal Transversal skills with the **VALITS 2.0. Assessment Tool** that guarantees objective results.

Validating their skills by making their Informal Transversal skills visible and documenting them in a credible **Skills Certificate** that employers can trust

Supporting them by connecting the Assessment Tool to a **Learning Guide** that helps to find resources to improve their skills tailored to the individuals' needs.

Providing a **Training Manual** for professional qualification consultants of how to support disadvantaged and low-skilled persons in identifying and better using these skills.

**VALidating Informal and Transversal Skills for Disadvantaged Groups and Low Skilled Persons**

## INTELLECTUAL OUTPUTS

The **VALITS 2.0** project will develop **three new and innovative outputs**, which will for the first time provide disadvantaged and low-skilled persons as well as professional qualification consultants with guidance, tailored to their individual skills sets.

1

**The Assessment Tool** - A tool aimed at low-skilled persons that is based on a set of tests and questions that will indirectly extract skills from the user and rate them objectively.

2

**The Skills Learning Guide** - This digital database will provide information on learning opportunities based on the personal assessment score.

3

**The Training Manual** - aimed to provide professional qualification consultants with the necessary training and understanding to support target groups in the better use of their skills.

# VALITS2.0

Co-funded by the  
Erasmus+ Programme  
of the European Union

## PROJECT PARTNERS

The partner consortium brings together **five partners** from **Spain, Austria, Denmark, Poland** and **Portugal** who are well experienced in working on education related projects.
